

The figure displays two side-by-side box plots comparing the distribution of 'number' for two categories: 'none' (left) and 'small' (right). The y-axis represents the 'number' variable, ranging from 0 to 20. The x-axis labels are 'none' and 'small'.

Box Plot for 'none':

- Median:** Approximately 10.
- Q1 (Lower Box):** Approximately 5.
- Q3 (Upper Box):** Approximately 15.
- Whiskers:** Extend from approximately 0 to 18.
- Outliers:** Numerous points are plotted below the lower whisker, ranging from approximately 1 to 4. There are also several points above the upper whisker, ranging from approximately 16 to 19.

Box Plot for 'small':

- Median:** Approximately 10.
- Q1 (Lower Box):** Approximately 5.
- Q3 (Upper Box):** Approximately 15.
- Whiskers:** Extend from approximately 0 to 18.
- Outliers:** Several points are plotted below the lower whisker, ranging from approximately 1 to 4. There are also several points above the upper whisker, ranging from approximately 16 to 19. A significant outlier is present at the value 20.
